del.icio.us

Ich benutze ja seit geraumer Zeit einigermaßen intensiv del.icio.us, um meine Links zu organisieren. Wenn man mehr als zwei Rechner (SunRay in der Firma, Notebook der Firma, Mac Mini zuhause) hat, werden alle anderen Wege um Bookmarks zu sortieren, schnell ineffizient.

Ich habe jetzt meinen del.icio.us-Account so konfiguriert, dass die Links, die ich über den Tag so einstelle, automatisch um 13 Uhr in mein Weblog gepostet werden. Vielleicht könnt Ihr ja mit dem einen oder anderen Link etwas anfangen.
